

Best Creator
Year 5

.Mission: Beast Creator

A super strong aphid is destroying crops across the UK. United Nation scientists have decided to use selective breeding to create a super minibeast that can exterminate these greedy aphids. As a member of the selective breeding team, you must create a super beast in order to control or exterminate this outbreak.

A bug, a creepy-crawly, a beast. He'll tickle
your skin then go in for the sting.

Arachnids, insects, molluscs and myriapods,
hiding in nooks and beneath darkened
rocks. Come search for these minibeasts,
and let's sort them out. How many legs?

How many wings? Who does it eat and who
eats it? Can you classify it? Can you draw it

or make it? Build a bug hotel or a
wonderful wormery, then watch them

wriggle and burrow, mixing earth as they
go. Discover where in the world you'll find

the deadliest beasts. Perhaps the *Vespa*
mandarinia japonica is the one that you

fear? Why not become a beast creator?

Selectively breed a killer predator that
saves the world from the super strong

aphid. You'll be a hero. 'There was an old
lady who swallowed a fly. I don't know why

she swallowed a fly. Perhaps she'll die.'
